Notice: 3M™ Double Coated Tape 9731 Secondary Liner Change

Dear Valued Customer,

3M has qualified a new PET release liner for used in 3M™ Double Coated Tape 9731 and 3M™ Double Coated Tape 9731RW (Reverse Wound). The updated liner on the silicone adhesive side has a non-silicone/non-fluorinated release chemistry.

The liner will be the same thickness as the previous liner (3 Mils, 0.076mm). Customers may notice the PET liner is easier to remove from the silicone side of the tape. All other aspects of the product will remain the same as there are no additional changes to the other raw materials or manufacturing process of the product. 3M stock numbers will not be changed due to this update.

The new liner will begin to be implemented in the third quarter of 2024. This change should not impact the fit, form, or function of the product.

We are here to help support you if you have any questions. Please contact your local 3M representative to further assist with your immediate needs. Thank you for your continued support of 3M products and solutions.

Best regards,

Andrew Goodrich

US and Canada Portfolio Manager
