RE: Supply Disruption - Force Majeure and Commercial Impracticability

Dear Valued Customer:

We are sending this letter to inform you about a situation that may impact our ability to supply certain products. One of our input material suppliers recently informed 3M of their inability to supply due to their own inability to obtain a key raw material from an upstream supplier.

In the interest of proactively sharing this information with you, we are alerting you to the potential of supply disruptions involving the 3M Automotive and Aerospace Solutions Division product 3M™ AF126FR. We do not expect any other product to be impacted.

Our supplier's inability to obtain and supply critical raw materials leads 3M to declare a force majeure event and/or commercial impracticability of performance.

We are currently analyzing the availability of the products. We are also evaluating available options to minimize customer impact and working diligently with our supplier and the upstream raw material supplier to obtain more information. In parallel, where practical, we are working towards evaluating a potential alternative formulation to eliminate the reliance on the impacted raw material.

We value our relationship with you and appreciate your patience as we work through these challenges. We will update you as we learn more.

If you have any questions regarding this notice, please contact your 3M sales representative or customer service representative.

Sincerely,

Brian Coleman, President
3M Automotive and Aerospace Solutions Division
3M Center, Building 223-3S
St. Paul, MN 55144-1000
