Dear Valued Customer,

Huntsman Advanced Materials has moved the production of below VERSAMID® materials made at the Rock Hill, SC site to the Taboão da Serra production plant (TdS). TdS currently produces several grades of reactive polyamide resins and has capacity to absorb the volumes that are currently produced at the Rock Hill, SC site. TdS will use the same recipe and raw materials used in the Rock Hill, SC plant and is moving forward to the production VERSAMID® products at the TdS facility. The following are the impacted materials with the new TdS material:
