

Raw Material Changes for URALANE® 5774 A/C

September 21, 2023

Dear Valued Customer,

Huntsman Advanced Materials has previously communicated verbally the impending change of a raw material affecting the product below. It is being transitioned out due to REACH compliance regulations. This change will require the formulation for this product to be updated.

The current (uncured) product will not be allowed to enter China starting January 1, 2024. Our technical and process development teams are finalizing the new product reformulation and targeting completion before the end of 3Q2023.

Please continue to place orders for the current product with delivery dates through 2024. These orders will be shipped in full pending no regulatory compliance changes in 2024. Orders with delivery address in China will be rejected.

Product Family of Current Material Name Being Deactivated	Product Family of New Equivalent Material Name
URALANE® 5774 A/C US	URALANE® 5774-1 A/C US

It will be the buyer's responsibility to ensure that none of their inventory of the current (uncured) product arrives in China after December 31, 2023. There are no restrictions on the current (cured) product.

We understand and apologize for the inconvenience this may cause. The next update will contain the equivalency data, new SKU's and sample availability for the new product. We anticipate having this information available in late 4Q2023. The various specification approvals will begin subsequently. The specification owners will be responsible for the timeline required to complete their approval.

We remain committed to providing products to meet your business needs. Thank you for your understanding and cooperation in this matter. Please do not hesitate to contact your Huntsman Sales Representative or the undersigned with your questions.

Best Regards,

A handwritten signature in black ink that reads "Todd Roppo". The signature is written in a cursive, flowing style.
