

Raw Material Changes for URALANE® 5779 A-80/B

November 6, 2023

Dear Valued Customer,

Huntsman Advanced Materials is required to change one of the formulation components for the product below due to REACH compliance regulations.

The current (uncured) product will not be allowed to enter Europe beginning November 27, 2023. Our technical team has identified a suitable drop-in replacement. Due to timing constraints, we will roll the part number to maintain proper change management control.

Please continue to place orders for the current product with delivery dates through 2024. These orders will be shipped in full unless notified otherwise. It will be the buyer's responsibility to ensure that none of their inventory of the current (uncured) product arrives in Europe after November 27, 2023. There are no restrictions on the current (cured) product.

Current Material Name Being Impacted	New Equivalent Material Name
URALANE® 5779 A-80/B US	URALANE® 5779-1 A-80/B US

We understand and apologize for the inconvenience this may cause. The next update will contain equivalency data, SKUs, and sample availability of the new product. The specification approvals are underway. The timing of the next update is contingent on completion of the approvals.

We remain committed to providing products to meet your business needs. Thank you for your understanding and cooperation in this matter. Please do not hesitate to contact your Huntsman Sales Representative or the undersigned with your questions.

Best Regards,

A handwritten signature in black ink that reads "Todd Roppo". The signature is written in a cursive, flowing style.
