Subject: Update on Supply Disruption – BONDERITE® M-CR 871 AERO

Dear Valued Customer:

Reference is made to our previous communication of September 2024 (copy attached) where we updated you on a supply disruption involving a raw material used in the production of the BONDERITE M-CR 871 AERO products ("Products") listed in the table below.

Product IDH	Product Description
1446362	BONDERITE M-CR 871 AERO
2675626	BONDERITE M-CR 871 AERO

Per our prior communication, Henkel has now qualified the raw material from the alternate source for use in the manufacturing of the Products. The new raw material source has the same CAS number as the prior raw material source. To ensure adherence to finished goods specifications, Henkel maintained strict adherence to its Quality System requirements during this qualification process. Based on Henkel internal testing, we do not anticipate any impact to form, fit or function of these Products due to this change.

In addition Bonderite M-CR 871 AERO is labeled active on the DOD website.

We are in the process of reviewing our ability to fill existing orders and will need additional time to confirm recent orders. If you have questions, please contact your Henkel Customer Service Representative.

Henkel appreciates your patience and understanding during this challenging period.

With Best Regards,

Jake Vlacich
