Subject: FREKOTE “F”-Style 1 Gallon Can and Cap Change

Dear Valued Customer,

This is an update on our previous communication sent in October 2022 regarding the packaging of FREKOTE mold-release products in 1 Gallon “F”-style cans. As previously stated, Henkel switched to a can with thicker metal walls with the same dimensions and labelling as the previous can. The can was furnished with a red spout.

Henkel recently discovered an issue with the spout. To counteract this, Henkel has identified a new irradiated red cap that is compatible with the current can. The new cap will not include a spout. The new can and cap combination have received the necessary UN certification. We will implement the new packaging as a running change and customers can expect to receive it as early as May 2024.

Top View

Benefits of the new packaging combination are summarized below:

- Thicker metal can walls eliminate damage in shipping and handling.
- Same dimensions and labeling as the previous can are maintained.
- Easily identifiable change: the old can has an extendable spout, while the new can has a simple cap.
- The cans are made of the same material but with thicker walls.
- The can and new cap combination have received UN approvals.
- Product performance, package compatibility, and shelf life are unaffected by the packaging change.
- Improved quality due to the elimination of can damage.

Please see list of impacted products below. We value your continued business with Henkel and are here to address any concerns or questions you may have regarding this change. Henkel takes pride in providing best in class products, and we look forward to continuing to support your application needs. Please address any questions to our Henkel Technical Customer Service Team (tech.services@henkel.com or 800-562-8483).

Sincerely,

Jay Reddy
