Henkel recommends testing any alternative product under simulated or actual end use conditions to ensure the adhesive meets or exceeds all required product expectations. Since assembly conditions may be critical to adhesive performance, it is also recommended testing be performed on specimens assembled under simulated or actual production conditions.

Please contact Henkel Technical Customer Service (800-562-8483) or your local Henkel sales representative for assistance in selecting a replacement product if the listed alternative is not satisfactory.

Sincerely,

Sandra Adams
