Adhesives – Tooling NEWSLETTER:

ARALDITE® AW 2104 and ARALDITE® 2012 A update

Dear Valued Customer,

We would like to inform you that in the next months we will update both the SDS and label for ARALDITE® AW 2104 and ARALDITE® 2012 A.

The reason for this change, is that for both the SDS and the label we have decided to classify according to the latest data from the REACH registration of the reactive diluent, 1,4-bis(2,3 epoxypropoxy)butane, CAS 2425-79-8.

Under the EU CLP rules, ARALDITE® AW 2104 and ARALDITE® 2012 A need to be classified as reprotoxic, Cat. 1B with the hazard statement “H360F: May damage fertility.”

Therefore, it will need to be labelled with the signal word “Danger” and the “Health Hazard”

pictogram:

Huntsman Advanced Materials is completing this change and aerospace specification custodians have been invited to work through an evaluation and guidance on the material.

We appreciate your patience and support.

Enriching lives through innovation

Should there be further clarification needed, please contact your usual sales representative.

Yours sincerely,

Huntsman Advanced Materials (Switzerland) GmbH
