

August 1, 2024

Dear Valued Customer,

We are writing to inform you of some important updates regarding our Socoglaze military product line.

Due to a higher-than-normal order volume for Socoglaze PT-799 gloss white 17925 (on QPL for MIL-PRF-85285 TY. I/II/IV Class H), the product, and colors made from it, are not currently available. We are offering an equivalent QPL product, which exceeds the spec requirements that PT-799 met, pending the NAVAIR QPL approval of PT-799 at our Rhome, TX facility.

The QPL MIL-PRF-85285 Type I/II/IV Class H, Form M, Grade P product is available in color 17925 among other SAE-AMS-595 colors. We offer both the SAE-AMS-STD 17925 and the highly requested Untinted White, which is custom matched to all previously purchased PT-799 17925. This product differs in mix ratio from our Socoglaze PT-799 (3:1 versus the PT-799 1:1 mix ratio).

The Socomore MIL-PRF-85285 Types I/II/IV, Class H, Form M, Grade P Gloss QPL is in the final approval stage; the first round of stamps of approval are in process. This Socomore product is called Socoglaze 85285 and is also a 3:1 mix ratio by volume as opposed to the 1:1 of the PTI formula.

- Please inform your sales representative or our customer service department if you or your end users request the PTI product PT-799 material specifically so we can support the switch over to the Socoglaze 85285 pending the PT-799 Socomore QPL (expected in 2025)
- This update is part of our ongoing efforts to minimize lead times and align with the needs of our customers.

To place an order or discuss your specific needs, please reach out to our customer service team at [[csr-na@socomore.com](mailto:csr-na@socomore.com)]. They will provide custom quotes and establish a delivery timeline specific to each request. They can also connect you with our technical sales team to answer any product questions you may have or to find alternate products.

We greatly value your partnership and trust in our Socoglaze products.

We appreciate your business. Thank you for choosing Socomore.

Best regards,

Kristina Laramée, NA Military Aerospace Business Development Manager
